★ Goal

To contribute to and learn from a highly motivated and skilled team of UX/UI designers and developers

📖 Education

Sept 2013-Present Ryerson University - Bachlors of Science: Computer Science (on hiatus)
Graduating class of 2017

💼 Employment

S&P Capital IQ- CSS Designer
July 2015-Dec 2015

Parachuted into a role where my main gola was to manage CSS styling for a very complex portfolio management and simulation software. Worked with frontend and logic implimentation programmers all the way to designers to come up with a cohesive design and create functional aesthetic

Robido Media - Lead Designer
Sept 2013-Nov-2014

Co-founder at a design and development consultancy start-up. Primarily in charge of user experience and user interface for all projects. Secondary duties include assisting with the development side including writing HTML/CSS/JS as well as working on backend such as MySQL and PHP.

Higher - UX/UI Developer
Jun 2013-Sept 2013

A university start-up interested in helping students submit multiple part time job applications by filling out a single form. Was in charge of making sure that frontend and backend were compatible with one another and that the user interface was easy to elegant and easy to use.

Freelance UX/UI Developer
Sept 2011-Sept 2014

Worked on various contracts concerning identity worked but also ventured into fully custom, built from the ground up websites as well as designing print and other online media.
